

30 Days to *Strengthen* Medicaid

On **April 21**, CMS Administrator **Dr. Mehmet Oz** directed every state to submit — within thirty days — a plan to revalidate Medicaid and Medicare providers in high-risk areas. States must prove providers exist, deliver real care, and have the right to bill. **MENDRx** supplies the serialized verification infrastructure to answer with evidence, not assertions.

§ NEXT STEP

Request a 30-minute briefing *before* your CMS response is due.

MENDRx will walk your Medicaid director, integrity unit, and governor's office through a **30-day response template**, a **pilot claim-to-unit match framework**, and the verification artifacts CMS reviewers are likely to request.
